#### PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (I) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

#### SUMMARY

This fence-enclosed POL area, in the center of Mogilev Podolskiy, is served by the city streets or roads and is near the single track rail line which passes through the city in a generally north to south direction.

The installation covers approximately 450,000 square feet of vegetated area and contains seven vertical POL tanks. A probable

caretakers quarters is at the entrance. Other structures or POL loading/unloading gear are not discernible on available photography.

This installation was covered by [REDACTED] KEY-HOLE missions between [REDACTED]. There are no significant changes apparent.

#### DESCRIPTION OF INSTALLATION

##### Road Service

The installation is served by city streets or roads. The main roads leading to Mogilev Podolskiy as well as the streets within the city appear to be crushed rock gravel, one or two lanes wide.

##### POL Storage Area

Area G contains seven POL tanks with the following diameters: two 45 feet, four 35 feet, and one 20 feet. All the tanks are vertical and probably painted with a light tone reflective paint to minimize the expansion of the liquids they contain. Only five tanks were reported for this area on the referenced US Air Target Chart.
